QLAD

STAINLESS MATERIAL

Stainless steel cladding not merely contribute the strength to the surface they embraced, but with the array of colors and textures, they, thus, astonishingly, be able to enrich the visual sensibility among the tactile expression to the interior surface we experience.

With these notions, Q L A D had shifted the coldness of stainless surfaces through our technological performance by marrying the quality of the raw stainless material to the aesthetically pleasing surfaces, reaching its infinite variations and finishes and bringing the material to its best potential to serve all meticulous choices from our designer partners

PRODUCT INFORMATION

STAINLESS GRADE	304 / 316
SIZE	1220 x 2460 mm. 1220 x 3060 mm. 1220 x 4000 mm.
THICKNESS	1.00 mm. 1.20 mm.
COATING	TITANIUM PVD With NAS
TYPE OF USE	INTERIOR

THE BASICS ON STAINLESS CLEANING

Avoid using harsh abrasives, scouring powders, steel wool, bleach, and ammonia, all of which can damage the finish.

STAINLESS CLEANING TIPS

Step 1)

Dip a soft cloth in warm water mixed with a mild dish detergent. Wipe the surface, rinse the cloth and wipe again, then dry with a towel to prevent water spots.

Step 2)

If you still see fingerprints, spray a glass cleaner onto a soft cloth and wipe fingerprints away.

Step 3)

To remove baked-on food and grease, make a paste of baking soda and warm water. Gently rub onto the surface using a soft cloth or sponge. Wipe with a clean wet cloth and towel dry. For scratches and stains, use a stainless steel cleaner and apply to the area, following directions. Rinse with a clean damp cloth, then dry.

CAUTION

- ⊘ Do not coat stainless steel with wax or greasy substances. Because it will make the dust stick and difficult to clean
- ⊘ Do not use products that contain ingredients Chlorides, Halides, Bromine, Iodine and Fluorine.
- ⊘ Do not use antiseptics to clean stainless steel.
- ⊘ Do not clean stainless steel with tight stains in one step. Should use basic cleaning methods first.
